theo and ulku!

I drew Theodor and Ulku from PSO2!

They have to be some of my favorites, especially Ulku since I love her positive outlook! She also kind of reminds me of myself, and she kind of looks like me too...

I really like this piece, and it is actually a redraw of a older piece! I did this in the summer before 8th grade, and the old piece is the summer before 7th grade.

(this is the piece)

(this is the old one, I really liked it when I made it but it kind grew off me)
